

Baisotti, Sara		
<b>Effects of parenchymal cells on asexual reproduction in <i>Schmidtea mediterranea</i></b>		44
Battaglino, Grazia		
<b>Establishing a novel chemically defined hydrogel for the enhancement of endodermal organoid systems</b>		45
Beavis, Thomas		
<b>Motility matters: Scoping the impact of a non-model diatom-ciliate symbiosis</b>		73
Ber, Tobiáš		
<b>Towards developing <i>Deroceras</i> slugs into laboratory models</b>		46
Bourn, Jess		
<b>Cell-type-specific control of developmental rate across species</b>		47
Cardini, Ulisse		
<b>Facilitative interactions on the rise: seagrass as a model</b>		48
<b>Cancelled</b>		49
Hoetzinger, Matthias	Presenter: Bertilsson, Stefan	
<b>Geographic population structure and dynamics of freshwater bacteria in the wild</b>		50
Köhnen, Sven	Presenter: Ulbricht, Pia	
<b>Fru gene specifies cooperative male behaviors in honeybee colonies</b>		51
Lotharukpong, Jaruwatana Sodai		
<b>Evolutionary landscape of gene expression in brown algae</b>		52
Materne, Anne		
<b>A minimal mechanical model for <i>Clytia hemisphaerica</i> regeneration</b>		53
Mathers, Thomas		
<b>Chromosomally complete reference genomes for challenging species: overcoming sequencing dropout in bird microchromosomes</b>		54

Meiborg, Yani	
<b>A single-cell view of growth dynamics in <i>Schmidtea mediterranea</i></b>	55
Miticheva, Elizaveta	
<b>The impact of horizontal gene transfer on metabolic adaptation of <i>Acinetobacter baylyi</i> adp1</b>	56
Nemesh, Kateryna	
<b>Terrestrial slugs as prospective animal models for studying RNA silencing pathways</b>	57
Nogales Moral, Adrian	
<b>Proteome stability in tardigrade anhydrobiosis: insights into mechanisms from <i>Ramazzottius varieornatus</i></b>	58
Petrasiunaite, Vesta	
<b>Tempo, temperature and transcription factors: exploring the impact of developmental rate on developmental robustness</b>	59
Pieroni, Eleonora Maria	
<b>Investigating molecular determinants of nociception in <i>Octopus vulgaris</i> through a model hopping approach</b>	60
Pleitner, Mirko	
<b>Probing the universality of the nucleocytoplasmic density ratio</b>	61
Robering, Jan	
<b>Non-mulberry silk as biomaterial – from moth rearing to fibroin characterization</b>	62
Romanova, Katerina	
<b><i>Pseudomonas</i> gone wild: from PtoDC3000 to roadside isolates</b>	63
Santin, Anna	Presenter: Rogato, Alessandra
<b>Unveiling marine secrets: diatoms as models for nutrient sensing mechanisms in ocean life</b>	64
Sarropoulou, Elena	
<b>From genes to organisms: marine species as important evolutionary models, and for monitoring ecosystem health, pollution, and technical applications</b>	65

Seiler, Jana		
<b>Dedicated programing for eusocial colony formation in honeybees</b>		66
Smet, Francis		
<b>Characterizing planktonic cultures using image assisted flow cytometry</b>		67
Smith, Robert	Presenter: Witwinowski, Jerzy	
<b>The diderm Firmicute Veillonella parvula as new model to study outer membrane biogenesis and the diderm-to-monoderm transition</b>		68
Sudarsan, Suresh		
<b>Transcriptional control of high cell density phenotypes</b>		69
Vaidya, Gaurav		
<b>Visualizing the life-cycle decisions of a non-model planarian flatworm</b>		70
Wölbert, Lea		
<b>Extracting conserved cell identity signatures from the bone marrow of four evolutionarily diverged mouse species</b>		71
Zimmer, Frederic		
<b>Convergent evolution of H4K16ac-mediated dosage compensation shapes sex-dependent lifespan in a ZW species</b>		72
Beavis, Thomas		73
<b>Motility matters: Scoping the impact of a non-model diatom-ciliate symbiosis</b>
